

Memo from

To: Dean Rich.

JOSHUA LEDERBERG

Personal

Cost (out of) control
(what you already know)

This draft note stems from
some lunch room conversations
with Jim, Gene Poliss + others.

I had thought of passing it on
to Dave Hamburg with the
suggestion that the IOM take a
serious look at the impact of
"regulation" on hospital costs
escalation.

First, I thought you should take
a look -- let some further indirect
cost) doubtless a better (easier)
document could be generated.

I understand M&H is about to
rebel.
